

Images, Hyperlinks and Table in Html

 Tag

The tag is used to embed an image in an HTML page. The tag creates a holding space for the referenced image.

The tag has two required attributes:

- **src** - Specifies the path to the image
- **alt** - Specifies an alternate text for the image, if the image for some reason cannot be displayed

Example

```
<html>
<body>
<!-- Demonstration of image, links and table tags in html -->
<h1>Linking images using img tag</h1>

</body>
</html>
```

<a> Tag (Anchor Tag)

The <a> tag defines a hyperlink, which is used to link from one page to another.

The most important attribute of the <a> element is the **href** attribute, which indicates the link's destination.

Example

```
<html>
<body>

<h1>To define hyperlinks</h1>

<a href="https://www.mesce.ac.in"> MES</a>

</body>
</html>
```

<table> Tag

The <table> tag defines an html table. An html table consists of one <table> element and one or more <tr>, <th>, <td> elements. The <tr> element defines a **table row**, the <th> element defines a **table header**, and the <td> element defines a **table cell**.

Example

```
<html>
<body>

<h1>Table Headers</h1>

<h2>Horizontal headers:</h2>
<table border="1" bordercolor="green" bgcolor="cyan">
  <tr>
    <th>Name</th>
    <th>Email</th>
    <th>Phone</th>
  </tr>
  <tr>
    <td>Ann</td>
    <td>ann@example.com</td>
    <td>9124367852</td>
  </tr>
</table>

<h2>Vertical headers:</h2>
<table border="1" bordercolor="blue" bgcolor="pink" >
  <tr>
    <th>Name:</th>
    <td>Ann</td>
  </tr>
  <tr>
    <th>Email:</th>
    <td>ann@example.com</td>
  </tr>
  <tr>
    <th>Phone:</th>
    <td>9124367852</td>
  </tr>
</table>

</body>
</html>
```
